Rivers Without Borders

IN THIS ISSUE

Contents

01 **Rivers Without Borders** p. 3

02 **The Halda Comeback** p. 5

03 **Salt-Tolerant Rice** p. 7

FEATURE 01

Rivers Without Borders

Bangladesh sits at the sharp end of the climate transition. In this report our correspondents travel from the chars of the Jamuna to the negotiating halls of the world, following the money, the science and the people who live with the consequences. What emerges is a picture of a country that is adapting faster than its critics expect, and a set of hard questions about who pays, who benefits and how quickly the work can scale. Bangladesh sits at the sharp end of the climate transition.
